AI Sketch Robotic Arm

Your photo becomes a portrait drawn live

www.klmultimedia.com

AI drawing on the tabletop

AI line art

Turns a portrait photo into lines for drawing

Robotic pen drawing

Draws on paper while guests watch

Physical keepsake

Creates a personal souvenir for each guest

Personalized portrait line art

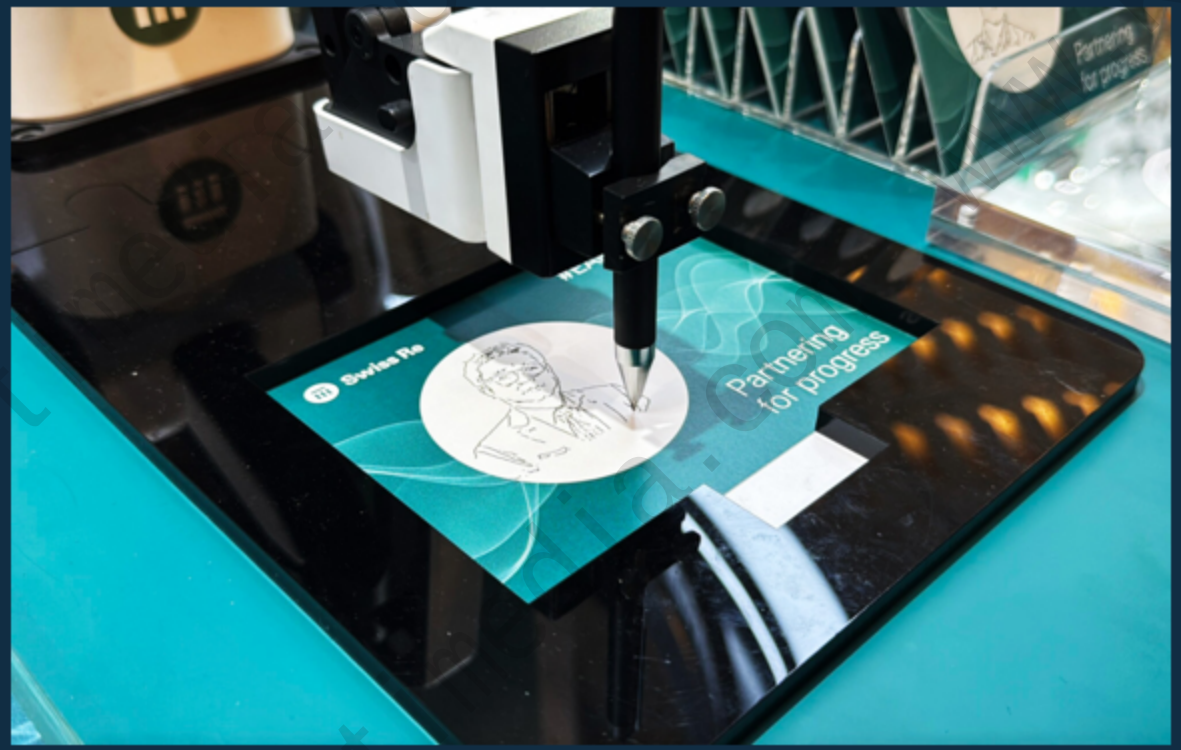

Available styles depend on the confirmed software configuration.

Photo
AI line art
Pen drawing

Realistic and cartoon portrait examples. AI creates line art, then the robotic arm draws it on paper.

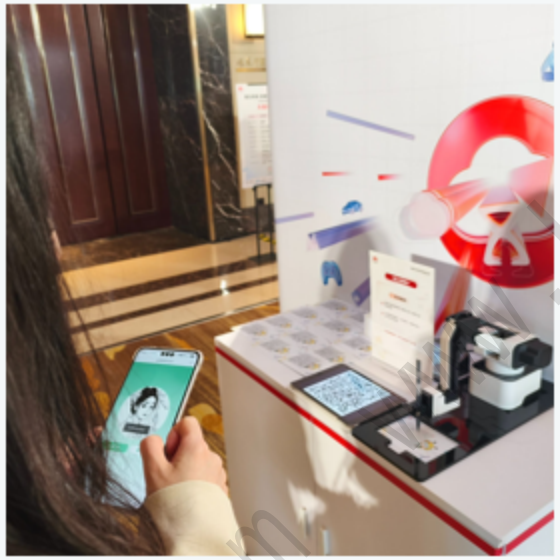

Live drawing with a real pen

The robotic arm holds a real pen
Guests watch the drawing in progress
Paper artwork shows physical pen strokes

Four steps to a personal portrait

01 Submit a photo

QR upload or on-site photo capture

02 Generate line art

AI prepares the portrait drawing task

03 Watch it draw

The portrait takes shape on paper

04 Collect the artwork

Take home a personal keepsake

Photo input, collection and digital image options depend on the project configuration.

A keepsake guests can take home

Themed paper

Match artwork to the event design

Artwork display

Arrange finished portraits for collection

Personal souvenir

Guests take their portrait home

An experience guests can watch

Exhibitions

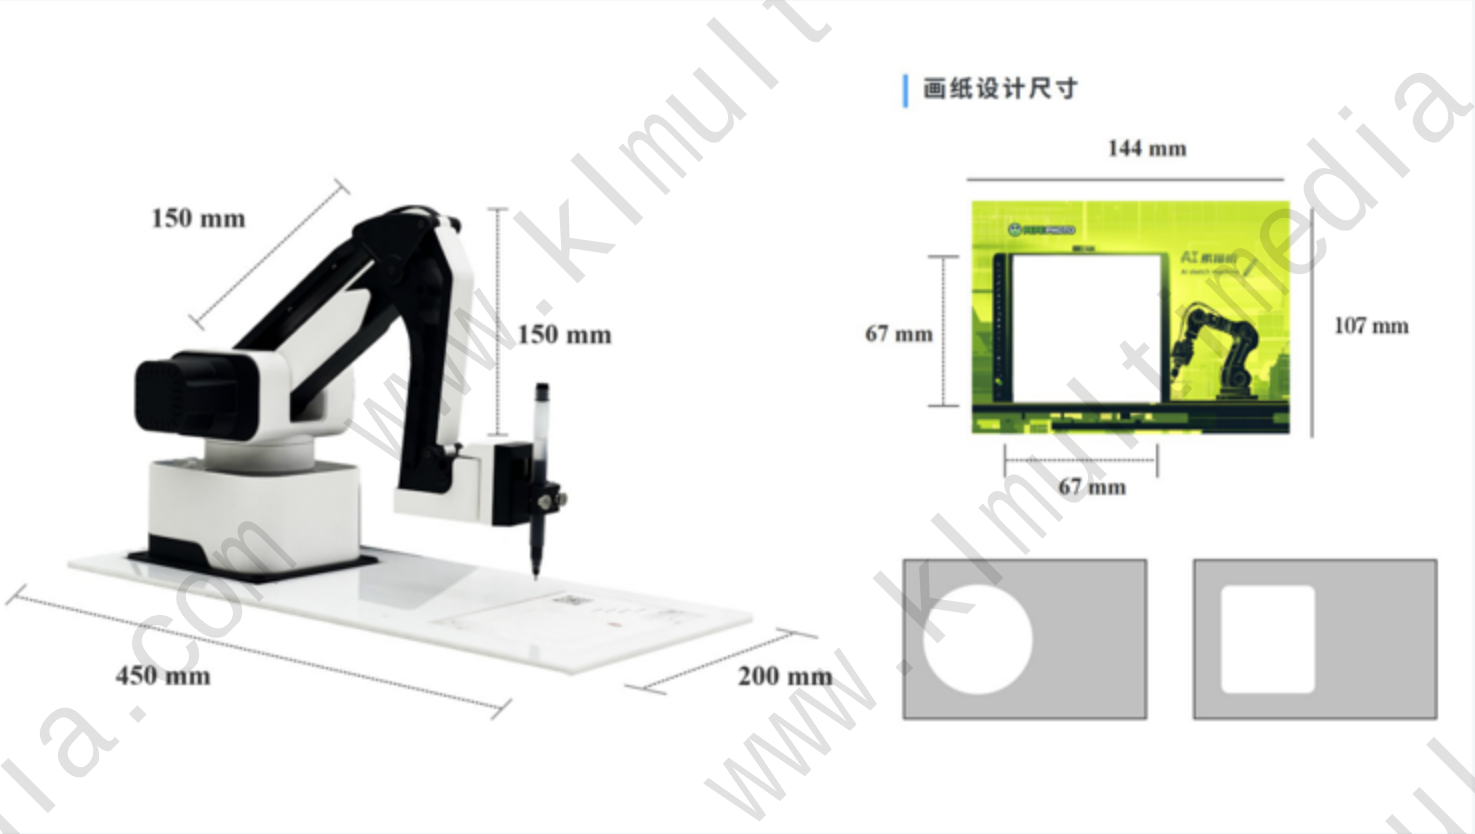

Brand events

Commercial spaces

Photos illustrate product applications and do not represent KLEADER project deliveries.

Complete system and deployment

Complete system

Compact robotic arm and software supplied together

Remote guidance

Tutorials and remote installation guidance

Site preparation

Buyer provides the tabletop, power and local installation

The image shows reference equipment dimensions. Final hardware, consumables, connectivity and optional equipment depend on the quotation.
