How to Use the VR Telescope Device:

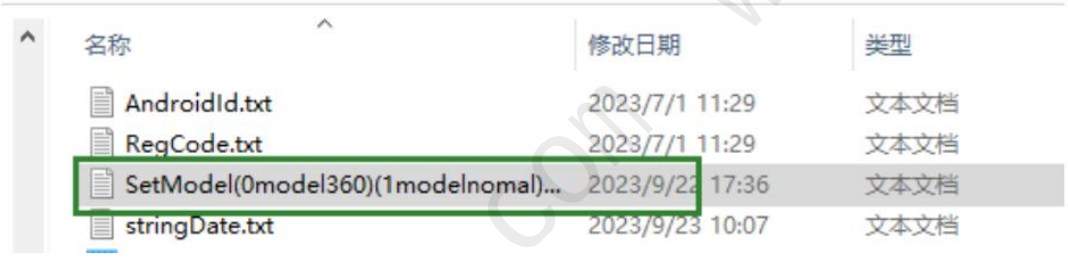

Video Import and Replacement:

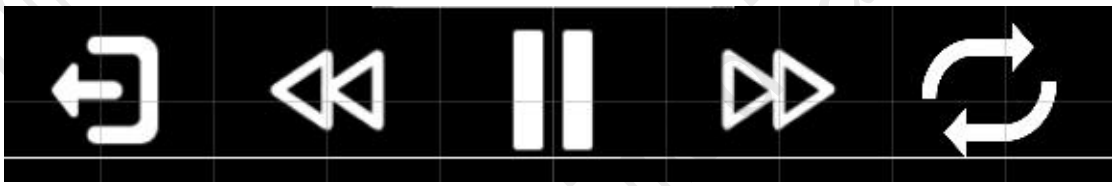

First, connect the device to your computer with a data cable.Navigate to the path Pico Neo 3\Internal shared storage\Android\data\com.KL.VideoPlayer\files, then drag and drop the media files you want to play into this folder.

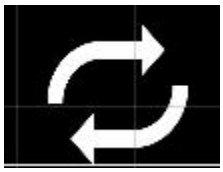

In the TXT file shown in the figure below, enter 0 or 1 to select the mode. 0 stands for the 360° panoramic mode, and 1 stands for the normal cinema mode.

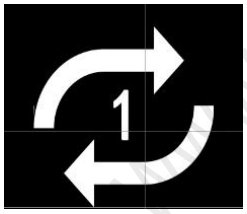

Press and hold the OK key for 5 seconds to open the menu
Click Back once to close it
After opening the menu
When the dot of the telescope aims at the button, interaction is available
Click the first button to exit the game
Click the second button to switch left
Click the third button to pause playback
Click the fourth button to switch right
Click the fifth button to set overall loop or single-track loop

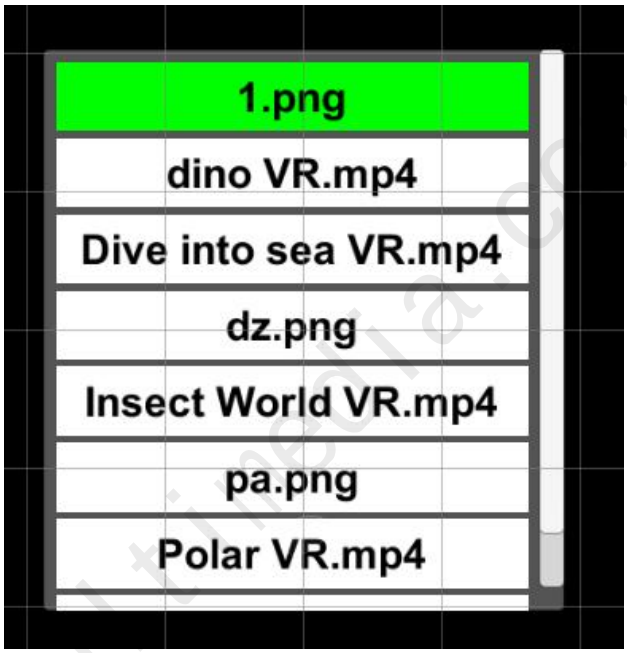

It is an overall cycle

It's on single loop

When you open the menu page, you can also see the playlist. Similarly, when the ray hits the list, hold down the trigger button or the right mouse button of the telescope and drag up and down to directly adjust the video playback position. Green indicates the currently playing material.
